

## Disclaimer

This site provides the Italian accelerometric data base relative to about than 7500 processed and formatted strong-motion records and associated earthquake, station and waveform parameters. The user can interactively search the fully relational database and download the selected strong-motion records and associated parameters. The strong motion records included in the data base are devoted to qualified users. The earthquake, station and waveform parameters are obtained from the best available data. Even if all the parameters have been checked by analysts, no warranty, implicit or explicit is attached to the data. Every risk due to the improper use of data or the use of inaccurate information is assumed by the user.

***Permission to use, copy or reproduce parts of the Database is granted provided that ITACA is properly acknowledged by including the two following references in the reference list:***
