

Statistics on the usage of the ITACA portal

The access to the ITACA 2.1 database has been monitored during 2016. On average, there are more than 1200 unique accesses per month (Figure 1). With respect to the 2015, there is a 50% of the accesses.

The majority of the users come from Italy (Figure 2), since Italian data are also available at the Engineering Strong Motion database (<http://esm.mi.ingv.it>), containing records from Europe.
